ADPI AMERICAN Dairy Products INSTITUTE™

ADPI/ABI 2024 ANNUAL CONFERENCE
Where the Dairy Industry Does Business
APR 28 - 30 | CHICAGO, ILLINOIS

ABI American Butter Institute

Over 900 attendees from 26 countries and more than 300 organizations registered and attended the ADPI Annual Conference. The focus of the Session was; Compared to thirty years ago, today’s food safety landscape is virtually unrecognizable. While some things remain unchanged, such as the value of strong food safety culture in an organization, the terrain has been reshaped by a wide array of forces ranging from advances in testing technology to modernized regulations to the ongoing evolution of government oversight. This panel of experts will take us on a journey across today’s realm of food safety, shedding some light on how the food industry mitigates risk through the application of time-tested principles alongside powerful new tools for detection and rapid response, in the context of heightened potential for costly and damaging product recalls.
